STATUS

Years of operation:

2022 -2024

THE CONTRACT: OFF ROAD HAULAGE

Bis provided a fleet of high payload haulage combinations – a solution that was developed inhouse - to load and haul run of mine (ROM) coal from the Isaac Downs ROM stockpile to the Isaac Plains ROM stockpile at the Isaac Plains Coal Handling and Preparation Plant (CHHP).

The scope of services was supported by a range of ancillary assets and services.

SCOPE OF SERVICES

- » Off-road haulage
- » Maintenance workshop facility
- » Road maintenance and dust suppression

PROJECT DESCRIPTION

Stanmore Resources is one of Australia's largest suppliers of metallurgical coals to global markets with three major coal-producing assets, including the Isaac Plains Complex, and Poitrel and South Walker Creek coal mines.

Isaac Downs and the Isaac Plains Complex is a fully approved underground mine project, with approval granted in March 2019 by the Queensland Government. It is expected to produce up to approximately 35Mt of metallurgical coal for steel making over 16 years.
